

How to Tutor Your Own Child: Boost Grades and Inspire a Lifelong Love of Learning--Without Paying for a Professional Tutor By Marina Koestler Ruben English Great ideas in here! English An excellent resource for parents who are interested in being involved in the educational process of their kids - she focuses on nurturing your child's love for learning rather than making it all about college applications or shiny report cards. The title is a bit misleading because the book is really about how to provide an enriching educational environment to your child the actual sit-down tutoring session is only covered in a few pages. Ruben has many ideas for all ages of students and she opened my eyes to seeing that many of the issues that we have lie with me :) English How to Tutor Your Own Child is a well written book. I would say that Marina Koestler Ruben offers sound educational advice and very practical assistance on how to answer questions that you might not have run across since you were the one taking the elementary/secondary class. Why teachers? Because I for one was trained to work with 20-30 kids who I could send home Ruben offers advice on how to help one (or a small group) who you need to feed clothe and sleep with while helping and not hurting anyone involved. As a parent-tutor you will learn how provide holistic academic support for your children and create an intellectual environment in the home—strengthening your relationship and improving parent-child communication in the process. Building on her proven “Six-Step Session” format Ruben shares the secrets to tutoring children in any subject from kindergarten through high school—all with a warm entertaining tone that will inspire you to inspire them, A refreshing and practical book - highly recommend! English Highly readable, Emphasis on love of learning & exploring together as well as respecting your children's homework time with quiet clear spaces. English Great book with solid strategies on how to tutor kids of various ages, The book however has a wide range of excellent and practical recommendations: I was thinking it might have a few ideas worth skimming through but really I found a lot of good ideas and reminders: It doesn't hurt that she is supportive of and willing to learn from homeschoolers, Ruben regularly recommends homeschooling resources from the Well Trained Mind to their forums, She has good reminders and suggestions on how to use technology how to engage your student ways to encourage and engage your children: The book might be worth reading for her checklists to read through for essays and math homework. It isn't one I'd own but I appreciated what she had to say as tutoring being truly parenting not just the responsibility of someone else: English There were some good tips and ideas in this book that I will definitely try to incorporate. Will it stick? I don't know but even if I can successfully implement a couple of things it will be useful. I have a degree in education and spent a few years as a substitute teacher where I had to field questions that were out of my area of expertise: how to teach/tutor) but she also includes things like how to design or set up the area where you will tutor so that the student will get the most benefit, I think this book can help build confidence with non-teacher parents and assist teachers as well. English This book is written by an experienced professional tutor who shares her expertise with parents. If you'd like to help your kids but don't know where to start this is an excellent tool: English {site_link} post a commentTutoring today is a \$4 billion industry (yes—billion) with companies like Sylvan Learning Center and Kaplan Tutoring cashing in. What are parents of today's overextended students to do? If only there were a resource closer to home that was easy free and able to provide the same quality of service: Top professional tutor Marina Koestler Ruben empowers you to take a do-it-yourself approach to your child's after-school enrichment, Ruben's accessible guide shows you how to balance big-picture curiosity with the academic nitty-gritties of homework assignments organization and electronic resources. How to Tutor Your Own Child: Boost Grades and Inspire a Lifelong Love of Learning--Without Paying for a Professional Tutor
