And trading ideas with thousands of students from all around the globe! I also provide an in depth Forex Trading Course that focuses on educating a limited number of students in my proprietary trading style. In this book you will learn: How to work with Price Action Price Action strategies that you can immediately put to use How Volume Profile works My favorite Volume Profile strategies How to find your own trading style and what are the best trading instruments to trade How to manage trading around macroeconomic news How to do your market analysis from A to Z How to manage your positions How to do a proper money management How to deal with trading psychology How to do a proper backtest and how to get started with trading your backtested strategies What are the most common trading mistakes and how to avoid them The exact ways and rules I apply to my own trading You will learn all this in a simple.

I am a full time trader with than 13 years of real trading experience. Most of them are showings 10pips profit but you can see that most of the times he was supposed to get stopped out by his stoploss or if his stop was extended then his risk:reward was lower than 1:1 which is a bad trading. I may be wrong but I get the impression Trader Dale makes the bulk of his income from selling things to traders rather than actual trading which itself makes me question how profitable his methods are. I really want to believe his set ups all work but if I had great expertise at trading I'd be trading full time and not selling courses making videos and hosting members chat rooms. Not value for money at all!!! Trader Dale If you want to learn beginner to intermediate level knowledge regarding the use of volume profiles in trading I highly recommend this book, That's why you need to learn to think and trade like an institution, I have a degree in finance I am a certified portfolio manager an investment manager in addition to my financial derivatives certification. I started my career in the world of finance as a market analyst for a major brokerage: After a short period I then moved into trading full time and set out on my own: My trading strategy focuses on following the footprint of big banks and other financial institutions who move and manipulate the markets. I do this using my custom made Flexible Volume Profile indicator, You can learn about me by visiting my website at where I share my experience setups poignant way along with many examples and pictures: VOLUME PROFILE: The Insiders Guide to Trading Great read filled with a 360 view of trading: From specific strategies to risk money management backtesting and psychology: Looking forward to putting it into action! Trader Dale Be careful with these strategies. In general book gives good understanding of the Volume profile and you can learn something from it but keep healthy scepticism: Practical advice and enlightening information for beginners on how the big institutions work, However my enthusiasm was dampened by the need to purchase his magic volume indicator and plug it into Ninja Trader: This led me to his website where there are copious adverts trying to sell courses and information, So bear that in mind before going wild with his strategies on the live markets: Trader Dale Where do I begin ?! Formatting of the book is dreadful, The chapter section was not properly labelled and had any page references, Moreover unusually large text and line spacing between sentences which definitely contributed to the publishing size of A4 print: Definitely not required and maybe A5 option could have been economically and eco friendly. I was not impressed with the informal manner which he explained some terminologies. I think his price action theory is partially based Wyckoff theory but explains it in quite brazenly tone in my opinion. Apart from the money management backtesting and price action strategy section this book is very dull and offers no substance and proper well written explanations. Institutions move and manipulate the markets. Book has 195 pages. Very easy to read and understand. Even the live trade examples are bad. Gl & hf Trader Dale A lot of good stuff in here. Comes across as a sensible level headed helpful guy. The book is basic in appearance but who cares. Had to request a return the next day. I would not recommend this book to anyone. The price is ridiculous as well. Trader Dale
